

Soundboard Pickups

For Small Instruments

The LP-15 Series - For Uke's, small sized soundboard instruments, and Guitars where size and weight are of utmost importance.

The LP-15 series is a new and revolutionary design for soundboard pickups

The LP-15 pickups are the smallest, thinnest, lightest, and lowest profile soundboard pickups extant. Built in a new patent pending process, they are less than one sixteenth of an inch thick at only 0.049" (1.25mm). The pickup sensor is extremely light in weight (weighing less than 2 grams) and does not inhibit soundboard movement or vibration.

Available in two models:

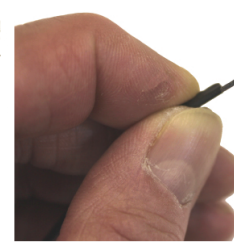

The LP-15 Insider: for internal mounting - comes with a take apart endpin jack

The LP-15 Outsider: for external mounting - comes with a 10 foot sheilded cable and 1/4" plug

LP-15's are designed to work properly without a preamp when going into any regular guitar amp.

LP-15 Insider

0.049"
1.25mm

LP-15 Outsider

For Medium Sized Instruments

The Dualie Series - For Guitars and other medium sized soundboard instruments

More Responsive Higher Output Lower Profile
Weights Just 10 grams (1/2 ounce) New, More Attractive Appearance

Available in two models:

The Dualie Insider: for internal mounting - comes with a take apart endpin jack

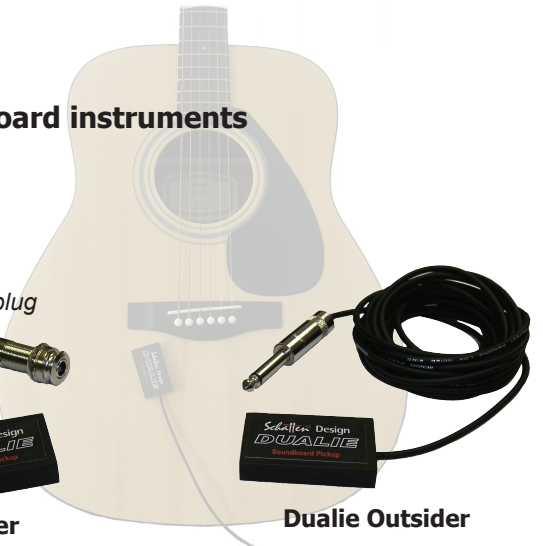

The Dualie Outsider: for external mounting - comes with a 10 foot sheilded cable and 1/4" plug

Versatility and ease of installation are the hallmarks of the Dualie. Originally designed as a soundboard pickup for guitars and measuring only 1" x 1 1/2" x 3/8", the Dualie has evolved into a multi-purpose pickup suitable for guitars and virtually any medium sized instrument with a soundboard. Available in two models, all Dualies come completely wired and are supplied with our special non-marring putty.

Dualies are designed to work properly without a preamp when going into any regular guitar amp.

Dualie Insider

Dualie Outsider

For Large Sized Instruments

The HD2-P2 - For Pianos and Hammered Dulcimers and other large sized soundboard instruments

The HD2 / P2 pickup system was designed for larger soundboards. Supplied with two separate transducer units each attached to a 10 foot shielded cord, the HD2 / P2 pickup system may be run stereo into 2 PA channels or into a single channel with the supplied 'Y' connector.

Dulcimer

D-4 Std.

Appalachian Dulcimer

Easy to install, the D-4 Std. appalachian dulcimer pickup comes complete with a simple to mount jack assembly. With no modifications required, the sensor mounts to the soundboard of the dulcimer with our special non-marring putty. The jack assembly mounts securely to the end block with 3M VHB tape.

Autoharp

AD-01

The AD-01 is a powerful, low profile pickup that was specifically designed for the autoharp. It can be mounted on the inside or outside of an instrument depending upon access and preference. The AD-01 comes complete and ready to use and no preamp is necessary when plugging into a regular amp.
