

### Violin and Viola Endpin Jack Instructions

This endpin jack has a standard violin taper of 30:1. The jack body diameter tapers from 9.25mm at the upper portion down to 8.75mm at the narrow end. It may be necessary to use a standard violin peg reamer to open up the endpin hole to fit this jack.

The wiring diagram below shows the wire assignments for stereo or mono applications. Optional for use in mono, the unused Ring contact may be jumpered to the Sleeve contact to provide extra internal connection for the ground circuit.
